

ALTERNATIVE BIO
(115 WORDS)

After being struck by lightning, Dr. Susan Bova was given a glimpse into the world of endless possibilities. She now has a mission to reach multitudes—to motivate, educate, and inspire others to go beyond the ordinary, to explore possibilities, and to experience the universe beyond the five senses.

Her formal education awarded her a PhD in holistic health science, an M.A. in human services/counseling, a B.S. in business administration and psychology, and an A.A.S. in sign language interpreting.

Her universal education taught her energy healing, hypnosis, and intuitive counseling.

As a visionary, seer, and healer, Dr. Bova opens doors to the sixth-sensory world and invites others to journey with her Beyond 5.
